Ruby on Rails Developer (full stack)

DEVELOPMENT EXPERIENCE

Full Stack Ruby on Rails Developer :: Fundly, Inc
Mountain View, CA February – August 2013

Fundly makes it easy to fundraise online. I worked as a full stack Ruby on Rails developer. I completed features on our rails application road map and fixed bugs

- Developed our internal admin tool, resulting in significant time savings for sales and product. Added 7 helpful modules and trained non-technical users in their use
- Built monitoring tool that helped engineering debug nightly scheduled tasks, resulting in reduced support requests and saved developer time
- Built a SalesForce integration that helped our sales team prioritize leads
- Built front-end of customer facing dashboard "to do thanks" feature. Built custom modals, extended presenters, and used an internal API to connect "thank you's" to our email system. This resulted in increased engagement with the fundraising platform
- Brought our QA process from nearly non-existent to an efficiently outsourced routine. Upgraded to TestLink (LAMP stack), oversaw outsourced team of 8, and managed 2 summer interns
- Used QA skills to improve own coding practices and problem solving
- Fixed bugs across the stack with occasional pair programming

Tech Stack
Rails 3.2.x, mysql, resque,devise, haml, sass, state_machine, compass, tinymce, databasedotcom, jQuery, coffeescript, rspec, fb_graph, wepay, cancan, SendGrid, bootstrap, debugger, unix

Demo of code I wrote at Fundly available upon request

Ruby on Rails Developer in Training :: Dev Bootcamp
San Francisco, CA October – December 2013

Dev Bootcamp is a 10-week intensive training in professional web development using Ruby on Rails. Dev Bootcamp orients student from day one towards seeking technical understanding, appreciation, and depth.

- 10 Week intensive curriculum studying Ruby, Ruby on Rails, SQL, jQuery, and git
- Practiced principles of object oriented design, engaged in pair programming and test driven development
- JavaScript and relational database design, studied messages between classes as interfaces
- Completed two Ruby group projects and one Ruby on Rails group project, served as rails project group lead

Tech Stack
Rails 3.2.x, postgresql, sqlite, devise, jQuery, JS, rspec, shoulda-matchers, factory_girl, capybara, database_cleaner, spork, guard, nokogiri, whenever, jasmine, unix

EDUCATION
- Dev Bootcamp, San Francisco, CA   2012
- Cornell University, B.A. Economics, Ithaca, NY   2008
- Philips Exeter Academy, Diploma, Exeter, NH   2004

PROJECTS
- Side project feedback.io, on private bitbucket, happy to send zip of it
- Order computer project in ruby https://github.com/rmf34/order_computer
- Sinatra driven login page I did in 2 hours for an interview: https://github.com/rmf34/interview-questions

OTHER WORK EXPERIENCE

Consultant :: 3V Consulting, LLC
Burlington, VT September 2010 – August 2012
- client recruiting
- assessing organization's needs
- making strategic decisions
- stakeholder assessment
